

SCORE YOURSELF IN TEN MINUTES

FIND OUT WHAT YOUR CUSTOMERS ALREADY KNOW.

Your customers grade your online presence every day. They just never show you the number. This scorecard does.

Five pillars, 100 points, every check something you can verify yourself in minutes with nothing but your phone. No tools, no logins, no opinions.

PILLAR	POINTS	WHAT IT MEASURES
Reviews & Reputation	30	The trust you've earned. Volume, rating, freshness, and whether you answer. Weighted highest because nothing moves a buying decision harder.
Website	25	Where trust converts or leaks. Speed on a phone, security, and whether a visitor can act without hunting.
Social Reach	20	Whether happy customers become an audience. Reach measured against your own review count, plus whether the account is alive.
Google Business Profile	15	Your listing in the map. Complete, photographed, and active beats big and stale.
Search Visibility	10	Found for the work, not the name. Whether you appear when a stranger searches the service you sell.

HOW TO RUN IT

Grab your phone. Open the next page. Check every box that's true for your business, add the points, and write your total. Be honest. Nobody grades this but you, and a flattering score costs you the whole point of the exercise.

1 • REVIEWS & REPUTATION	30 PTS
☐ 50 or more Google reviews	8

READ YOUR BAND

WHAT YOUR SCORE IS TELLING YOU.

80 - 100

TUNED

Your presence works. Whatever you're doing, keep doing it, and re-run this scorecard every quarter. The most common gap up here is the follower check. Even strong businesses leak audience.

55 - 79

LEAKING

The most common band, and the most expensive one. Your reputation is ahead of your reach. Customers who already trust you can't find you, follow you, or book you without friction, so the trust you earned goes to whoever shows up next in the search. Every point you're missing is a fix with a name on it. Most cost nothing but attention.

UNDER 55

BLEEDING

You're invisible where customers decide. The work is real, the reviews prove it, and none of it reaches the phone screen where the next customer picks a business at 9pm. The good news: scores down here climb fast, because the first fixes are the biggest ones.

WANT A SECOND SET OF EYES ON YOUR NUMBER?

I'll walk your real data with you in 15 minutes: what your score is, which points are cheapest to claim, and which one is quietly costing you the most. No charge, no pitch you didn't ask for.
