CLIENT

Big Valley Church

LOCATION

Turlock, CA

AUDITOR

Christopher List

DATE

May 4, 2026

THE SHORT VERSION.

Big Valley has a strong worship-stage brand and a clean email system. The gaps sit on the perimeter: exterior signage, social cover artwork, document templates, and a missing governance layer. Close those four and the score moves from 80 to the low 90s in one quarter.

OVERALL

80

Out of 100. Strong, with clear room to grow.

STRENGTHS

14

Items scoring a perfect 5 of 5.

TO IMPROVE

14

Items at 3 or below across both pillars.

GAPS

5

Governance items not yet in place.

WHAT'S WORKING.

The Sunday experience is on-brand. Stage, lyric slides, lower thirds, and series graphics all hit a 5. Email looks the same every send. Pinned posts and IG highlight covers feel intentional. Google Business Profile is dialed.

WHAT'S DRIFTING.

The favicon, brand color spec, and 404 page point to a website that grew organically. The social cover artwork lags a season behind. Bulletin and document templates are inconsistent across teams. Exterior signage looks like a different church than the one inside.

THE BIGGEST RISK.

No brand guide, asset library, or named owner is on file. Without governance, every fix you make this quarter starts to drift again next quarter. Lock the foundation first, then ship the polish.

WHAT TO DO NEXT.

Run a 90-day brand sprint. Week one sets governance. Weeks two through six fix digital and document touchpoints. Weeks seven through twelve handle exterior signage and the visitor packet. Page 11 has the schedule.

THE RUBRIC.

Every line item is scored on a five-point scale. The score reflects how a first-time visitor would experience the brand at that touchpoint, not whether the asset technically exists. A logo that loads is a 1. A logo that loads, looks crisp, sits in correct clear-space, and matches the rest of the system is a 5.

5

DIALED IN

Matches spec. On-brand across every angle. Nothing to fix.

4

STRONG

Reads on-brand at a glance. Small details could tighten.

3

DRIFTING

Recognizable, with visible inconsistencies. Worth fixing this year.

2

OFF-BRAND

Wrong color, old logo, stale artwork. First impression takes a hit.

N/A

NOT SCORED

Touchpoint does not apply, or no asset exists yet to evaluate.

Three pillars roll up to the overall score. Online and In Person each weigh forty points. Governance weighs twenty.

ONLINE

Every digital surface a visitor lands on before Sunday. Website, social profiles, email, listings, and digital asset templates.

IN PERSON

Every physical touchpoint from the parking lot to the lobby. Signage, print, stage, events, apparel, and guest-facing materials.

GOVERNANCE

The behind-the-scenes system that keeps the first two pillars from drifting. Brand guide, asset library, vendors, and review cadence.

WHERE YOU STAND.

Big Valley scores 80 out of 100. The brand reads strong on stage and in email, weaker on signage and social artwork. Governance is the gap that ties every other fix together.

ONLINE

4.0 / 5

Website, social, email and listings all hold the line. Favicon, brand colors, and the social cover artwork drag the score down.

IN PERSON

4.0 / 5

Stage, lyric slides, and event banners are dialed. Exterior signage and visitor materials are the weakest physical touchpoints.

GOVERNANCE

Not Set

No brand guide, asset library, or owner is on file. Without governance, every fix above will drift back inside a year.

WINS WORTH PROTECTING.

- Stage backdrop and screens
- Lyric and scripture slide template
- Sermon series graphics
- Lower thirds and motion graphics
- Email signature and newsletter
- Pinned posts and IG highlight covers
- Google Business Profile
- Sermon deck template

ONLINE, UP CLOSE

A visitor decides whether to walk in your doors before they ever leave the house. Five subsections roll up to the Online score. Three of them carry the weight at Big Valley. Two need work.

WEBSITE

3.6 / 5

Solid foundation. The header, footer, fonts, and meta tags are doing their job. The favicon, color spec, and 404 page betray a site that has been edited piece by piece without a master file to point to.

FIX: FAVICON, COLOR TOKENS, 404 PAGE

SOCIAL PROFILES

4.0 / 5

Pinned posts, IG highlight covers, and the recent grid all read 5 of 5. The cover artwork is the single weakest spot in the entire pillar at 2 of 5. Bio copy needs a one-line rewrite to match positioning.

FIX: COVER ARTWORK, BIO COPY

EMAIL

5.0 / 5

Perfect score across sender domain, signature, newsletter, and transactional emails. The brand reads identical from welcome email to giving receipt. This is the model to copy onto every other surface.

STATUS: PROTECT, DO NOT TOUCH

LISTINGS + THIRD-PARTY

4.3 / 5

Google Business Profile is dialed at 5. Yelp, church finders, and partner sites carry approved logos at 4. Light cleanup on a couple of legacy partner pages would push this to a 5.

FIX: LEGACY PARTNER LOGO SWAPS

DIGITAL ASSETS + TEMPLATES

3.5 / 5

The Sunday sermon deck template is a 5 and gets reused weekly without drift. Bulletin PDFs, livestream backgrounds, and document headers all sit at 3, which means they exist but do not match each other. Anyone on staff making a flyer is starting from a different file. Fix the template library and ten weak items snap into place at once.

FIX: BULLETIN, LIVESTREAM, DOCUMENT HEADERS

IN PERSON, UP CLOSE

Six subsections roll up to the In Person score. Worship-stage assets and event collateral carry the pillar. Building signage and visitor materials are the soft spots a guest sees on the way in.

BUILDING + SIGNAGE

3.3 / 5

The lobby and wayfinding read at 4. The exterior sign sits at 2 and looks like a different church than the one inside. This is the first impression and the cheapest single fix in the audit.

FIX: EXTERIOR SIGN, WALL ART REFRESH

PRINT COLLATERAL

4.0 / 5

Business cards, letterhead, brochures, connect cards, and swag all hold a steady 4. Light cleanup pass on print specs in the vendor file would move this set to 5 across the board.

FIX: PRINT SPEC CONSISTENCY

STAGE + WORSHIP

5.0 / 5

Stage backdrop, sermon series graphics, lower thirds, and lyric slides are all 5 of 5. The strongest set of assets in the building. The bar the rest of the brand needs to clear.

STATUS: PROTECT, DO NOT TOUCH

EVENTS + OUTREACH

4.3 / 5

Booth backdrop and banners hit 5. Tablecloths, retractable banners, badges, giveaways, and printed handouts all hold 4. A consistent palette pass would push the whole set to 5.

FIX: PALETTE PASS ON EVENT COLLATERAL

APPAREL + UNIFORMS

4.0 / 5

Shirts, polos, hats, and color match all sit at 4. The logo placements are correct, the color is close. Pantone-locked specs would get this to a 5 next print run.

FIX: LOCK PANTONE IN VENDOR FILE

GUEST-FACING MATERIALS

3.7 / 5

Welcome packets and thank-you cards sit at 4. First-time visitor materials are at 3, which is the touchpoint with the highest leverage on whether a first-timer comes back. Treat this as a priority fix.

FIX: FIRST-TIME VISITOR PACKET

GOVERNANCE IS THE GAP.

Five governance items are blank. Not low. Blank. No brand guide, no shared asset library, no vendor list with print specs, no named audit owner, no review cadence. Every fix on the next pages stays fixed only if these five are in place.

BRAND GUIDE

THE SINGLE SOURCE

- Logo, color, type, voice in one PDF ☐
- Linked from staff onboarding doc ☐
- Updated when assets change ☐

ASSET LIBRARY

ONE PLACE, ALWAYS CURRENT

- Logos, fonts, colors, templates ☐
- Old logos removed from drives ☐
- Permissions set for staff ☐

VENDOR LIST

NO MORE PRINT SURPRISES

- Approved print + signage vendors ☐
- Pantone, paper stock, coatings ☐
- Apparel decoration specs ☐

OWNER + CADENCE

WHO, HOW OFTEN

- Named brand owner on staff ☐
- Quarterly mini-audit ☐
- Annual full audit ☐

A brand guide is a one-time build. The asset library is a half-day setup. The vendor list is a Google Doc. The owner is a name. Without these four pieces, your 80 will slip back to 72 inside a year as new staff make new files.

FIX THESE FIRST.

Eighteen items scored at or below 3, plus five governance gaps. Group them this way and the work stays small.

GOVERNANCE GAP

THE FOUNDATION

Brand guide current and shared	–
Asset library in one location	–
Old logos pulled from drives	–
Vendor list with print specs	–
Audit owner and review cadence	–

WHAT A 5 LOOKS LIKE

A 5 is not a perfect church. A 5 is a touchpoint that does not make a guest pause. Here is the standard for the eight items that drag the score down today.

✓ FAVICON

The brand mark, on a transparent background, exported at 16, 32, 48, and 192 px. Loads crisp in the browser tab. Matches the social profile photo at a glance.

✓ BRAND COLORS

Hex, RGB, CMYK, and Pantone codes locked in the brand guide. Every button, header, and chart on the site uses the same six values. No off-by-one greens.

✓ SOCIAL COVER ART

Refreshed each sermon series. Same series art that lives on the stage screen, cropped for Facebook, Instagram, YouTube, and the website hero. One artwork, four crops.

✓ BULLETIN TEMPLATE

One INDD or Canva file. Locked layout, type styles, and color. Volunteers fill copy, not formatting. Every Sunday's bulletin reads like the same church made it.

✓ LIVESTREAM BACKGROUNDS

Lower thirds, scene transitions, and pre-stream loop all share palette and type with the stage. The livestream feels like attending, not watching from a different church.

✓ EXTERIOR SIGN

Current logo, current color, lit at night, readable from the road at 35 mph. Matches the lobby sign a guest sees thirty seconds later. The drive in and the walk in connect.

✓ 404 PAGE

Same header and footer as the site. A short on-brand line. A button back to the homepage. Not a default server page that breaks the spell.

✓ VISITOR PACKET

Designed like the sermon series, not like an HR onboarding doc. One folder, three inserts, a connect card, and a small gift. Hands a first-timer a reason to come back.

WHAT WE BUILD.

Four bundles, each tied to a fix theme on the previous page. Pick one or run them in sequence.

01 / Service

BRAND SYSTEM REFRESH

A clean color, type, and logo system that survives every doc, slide, and template you ship.

- LOGO LOCKUPS + CLEAR-SPACE
- FAVICON AND APP ICONS
- COLOR AND TYPE TOKENS
- BULLETIN, SLIDE, DOC TEMPLATES

02 / Service

SOCIAL & WEB POLISH

The first thing a visitor sees online. Cover art, profile crops, bio rewrite, branded 404.

- COVER AND BANNER ARTWORK
- PROFILE PHOTO CROPS
- BIO REWRITE TO POSITIONING
- BRANDED 404 AND OG IMAGES

03 / Service

SIGNAGE & LIVESTREAM

Exterior sign refresh and a livestream kit that matches the stage. One look, every screen.

- EXTERIOR SIGNAGE REWORK
- LIVESTREAM BACKGROUNDS
- LOWER THIRDS + SCENE GRAPHICS
- VISITOR PACKET REDESIGN

04 / Service

BRAND GOVERNANCE KIT

A guide, a shared library, and a named owner. The work above stays in place a year from now.

- BRAND GUIDE PDF
- ASSET LIBRARY SETUP
- APPROVED VENDOR LIST
- QUARTERLY REVIEW CADENCE

THE 90-DAY PATH.

Twelve weeks from kickoff to a 95. Each phase is short, scoped, and tied to a deliverable a guest will see on a Sunday.

WEEK 01 • KICKOFF

LOCK THE FOUNDATION.

Ninety-minute kickoff with the brand owner and senior staff. Pull every existing logo, font, and template into one shared drive. Confirm scope, roles, and review cadence.

DELIVERABLE: ASSET LIBRARY, NAMED OWNER, SIGNED SCOPE

WEEKS 02 - 03 • BRAND SYSTEM

THE GUIDE.

Refine the logo lockups, lock color and type tokens, and ship the brand guide PDF. Approved vendor list and print specs live inside the same document.

DELIVERABLE: BRAND GUIDE V1, VENDOR + PRINT SPECS

WEEKS 04 - 06 • DIGITAL + DOCUMENTS

SHIP THE TEMPLATES.

Favicon, 404 page, bulletin template, livestream backgrounds, document headers, and social cover artwork. Every digital fix on page 8 lands in this window.

DELIVERABLE: 10 TEMPLATES, SOCIAL PACK, BRANDED 404

WEEKS 07 - 09 • PHYSICAL TOUCHPOINTS

FIX THE PERIMETER.

Exterior signage rework, wall art update, and a redesigned visitor packet. Coordinate with the approved print vendor from the guide. Install around a Sunday with low foot traffic.

DELIVERABLE: EXTERIOR SIGN, WALL GRAPHICS, VISITOR PACKET

WEEKS 10 - 11 • POLISH + TRAIN

HAND IT OFF.

Train the brand owner and the comms team on the guide and the asset library. Run a tabletop walkthrough of the next bulletin, slide deck, and social post using the new system.

DELIVERABLE: STAFF TRAINING, WALKTHROUGH RECORDING

SCORE THE RESULT.

THE FULL CHECK

Every line item, scored. Five is dialed in. Three or below needs attention. A dash means we did not score it yet.
